

# INVENTORY CONTROL

The increasingly competitive nature of business today has forced managers to search for ways to cut costs more than ever. Inventory is one area where proper controls can bring large cost savings. GENESIS understands this and has developed an **INVENTORY CONTROL** system, which gives a business the information and tools to rapidly report and analyze needs. Written as a multi-company, multi-division, and multi-warehouse system, **INVENTORY CONTROL** remains easy enough for the inexperienced user to operate. When integrated into GENESIS' PURCHASING, ORDER PROCESSING, and FINANCIAL ACCOUNTING systems, **INVENTORY CONTROL** becomes part of a powerful management system.

## FEATURES

Some of the features and benefits available in **INVENTORY CONTROL** include:

WAREHOUSING  
 COSTING  
 PRICING  
 BILL OF MATERIALS  
 CONSIGNED  
 AUDIT TRAIL  
 CYCLE COUNT  
 POSTING  
 CLASSIFICATION  
 PURCHASING  
 SHIPPING  
 NUMBERING  
 AND MORE

Multiple warehouse locations and costs may be used  
 Standard, Last, Average, and FIFO costs are available  
 A flexible pricing and allowance matrix is available  
 Multi-level bills of materials are available to build assemblies  
 Items may be carried as consigned, finished goods, raw materials, etc.  
 A complete audit of all activity affecting the count is kept  
 Inventory is cycle counted by location with discrepancies reported  
 Items may be assembled, shipped, received, adjusted, scrapped, returned, etc.  
 Products may be classed, reported, and processed in a multitude of ways  
 Interfaces to PURCHASING are used to receive product  
 Shipped products are processed to ORDER PROCESSING and INVOICING  
 Flexible numbering allows up to a 12-position identification code

## **REPORTS**

Through a flexible reporting capability the operator can generate unlimited reports. All of our reports are available through easy to use menus, which can be quickly accessed. Some of the reports available include:

AVAILABILITY	The availability of items in one or all warehouses may be reported
VALUATION	Inventory valuation using various methods of costing is available
PRODUCT ANALYSIS	The history of movement is recorded and reported for a year
ACTIVITY	An audit of each activity affecting inventory count is reported
PROFITABILITY	By reviewing costs and sales, the product's profitability is shown
OVER/UNDER	Over and under stock reports are available
REORDER GUIDE	Information on stock counts, orders, and purchases are printed
PHYSICAL COUNT	Variance reports, count forms and inventory tags may be printed
TURNOVER	Various statistical calculations are made showing stock movement
WHAT IF	For bill of materials, item production plans may be made
AGING	Products may be reported by their length of time in stock
PRICE SHEETS	Pricing sheets may be printed as required
AND MORE	....

## **DESIGN**

As with all GENESIS software systems, **INVENTORY CONTROL** was written, designed and maintained by GENESIS. All packages are online database designed systems, which can run on Windows, Linux, HP9000 (Unix), and HP3000 (MPE) platforms. Access to the system is protected by our special security modules, which allows control of both, read and write capabilities for every screen. An online help facility is integrated into each screen.

## **CUSTOMER SUPPORT AND SERVICES**

Complete user documentation and object code are included in the price of the package. Continuing support, source code, and customization are also available.

### **SERVICES AVAILABLE INCLUDE:**

Technical and User Training	Data Collection Equipment and Consulting
Software Customization and Modification	Documentation Production
Updates and Enhancement Subscription	System Design
Installation Service	Sale Of Your Old Equipment
Remote Modem Support	Maintenance Services
Need and Requirement Consultation	Specification Development
Configuration Planning	Financing and Leasing Programs
