# PAYROLL

Virtually every **PAYROLL** system can take an employee from gross to net. So, why is GENESIS' **PAYROLL** system special? GENESIS has designed a payroll, which combines flexibility, ease of use, and the features you need to meet the ever changing tax laws and the demands associated with personal management. Flexibility is seen in the system's tables and files, which allow the user to build and maintain all earnings, taxes and deductions to meet a company's unique needs. Ease of use is apparent in the menu-driven screens and on-line help facility. The flow of the system is so logical and coherent a user can learn to use the system in one day. The features of this system are continually updated and enhanced to insure compliance with government regulations and allow better management of one of the most sensitive areas of an organization, **PAYROLL**.

DESIGN

As with all GENESIS software systems, **PAYROLL** was written, designed and maintained by GENESIS. All packages are online database designed systems, which can run on Windows, Linux, HP9000 (Unix), and HP3000 (MPE) platforms. Access to the system is protected by our special security modules, which allows control of both, read and write capabilities for every screen. An online help facility is also integrated into each screen.

CUSTOMER SUPPORT AND SERVICES

Complete user documentation and object code are included in the price of the package. Continuing support, source code, and customization are also available.
